

CREATE IBM WATSON IOT PLATFORM AND DEVICE

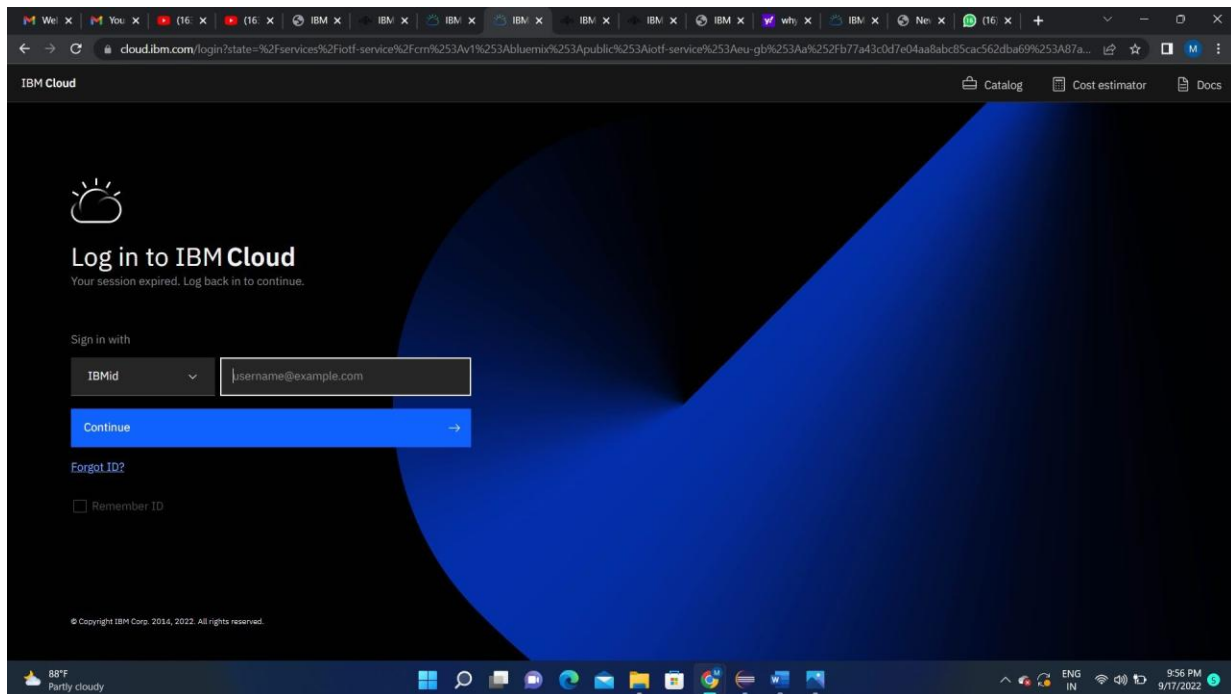

TEAM ID	PNT2022TMID33339
Project Name	IOT based safety gadget for child safety monitoring and notification

AIM:

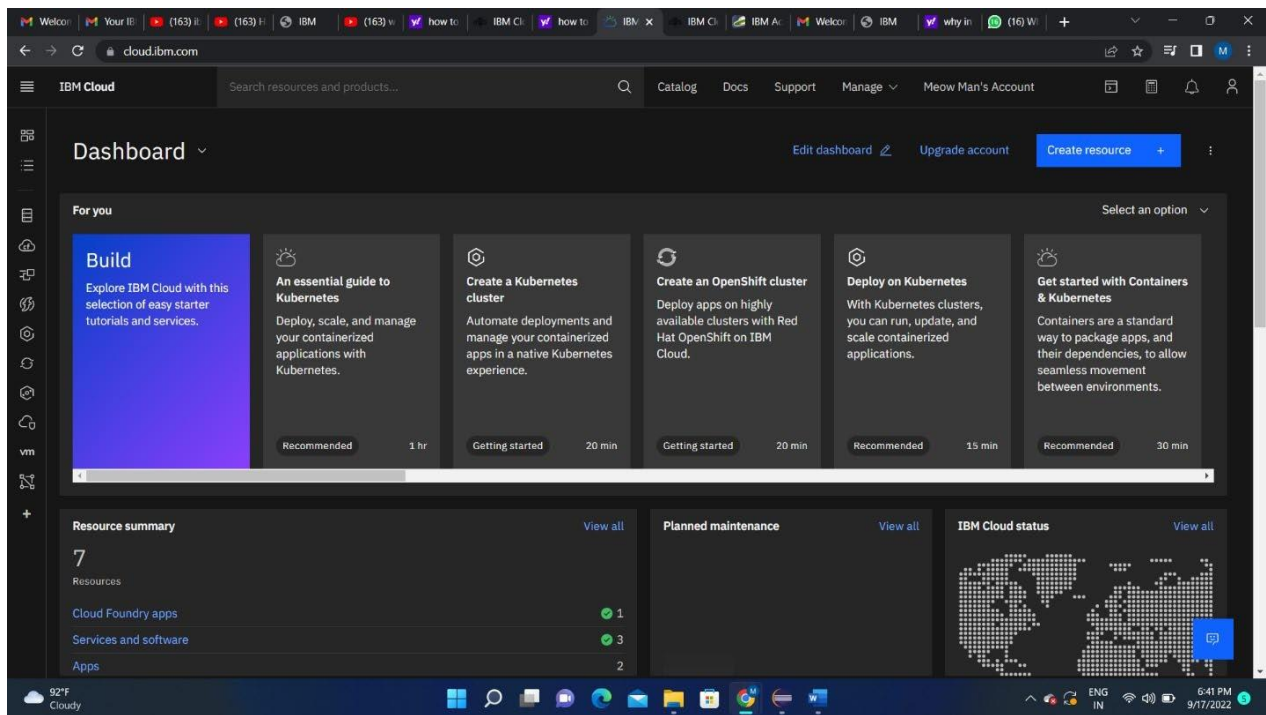

To create the IBM Watson IoT platform and device

STEPS:

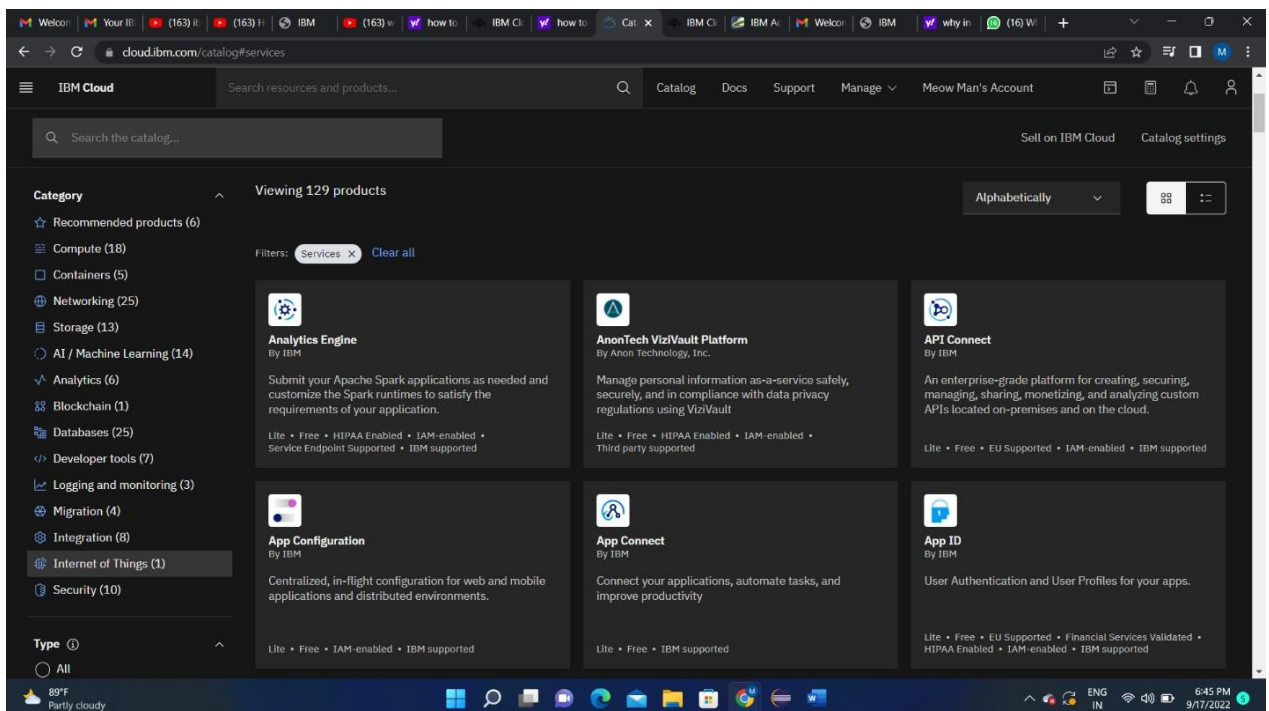

1. Firstly create an IBM cloud account with IBMid and password

2. Home page of IBM cloud

3. Click on the catalog on the top

4. Click on IoT in the category mentioned

IBM Cloud

7. Internet of Things Platform Child_safety will be created, where there are different options like manage, plan, and connection (manage is for launch, Plan gives us the idea about the payment package and its upgrades, and lastly the connection is for to connect IoT with other servies)

The screenshot shows the IBM Cloud IoT Platform console. The left sidebar has a 'Manage' tab selected. The main content area displays a welcome message: 'Let's get started with IBM Watson IoT Platform'. Below this, there's a section titled 'Ready for the next level?' with three options: 'Lite', 'Non-Production', and 'Production'. The 'Lite' option is highlighted with a checkmark. The 'Lite' plan description states: 'The Lite service plan provides a lightweight development environment to get you started with the connectivity capabilities of Watson IoT Platform.' It lists features: 'Free', 'Starts at \$500 per month', and 'Includes IBM Service & Support'.

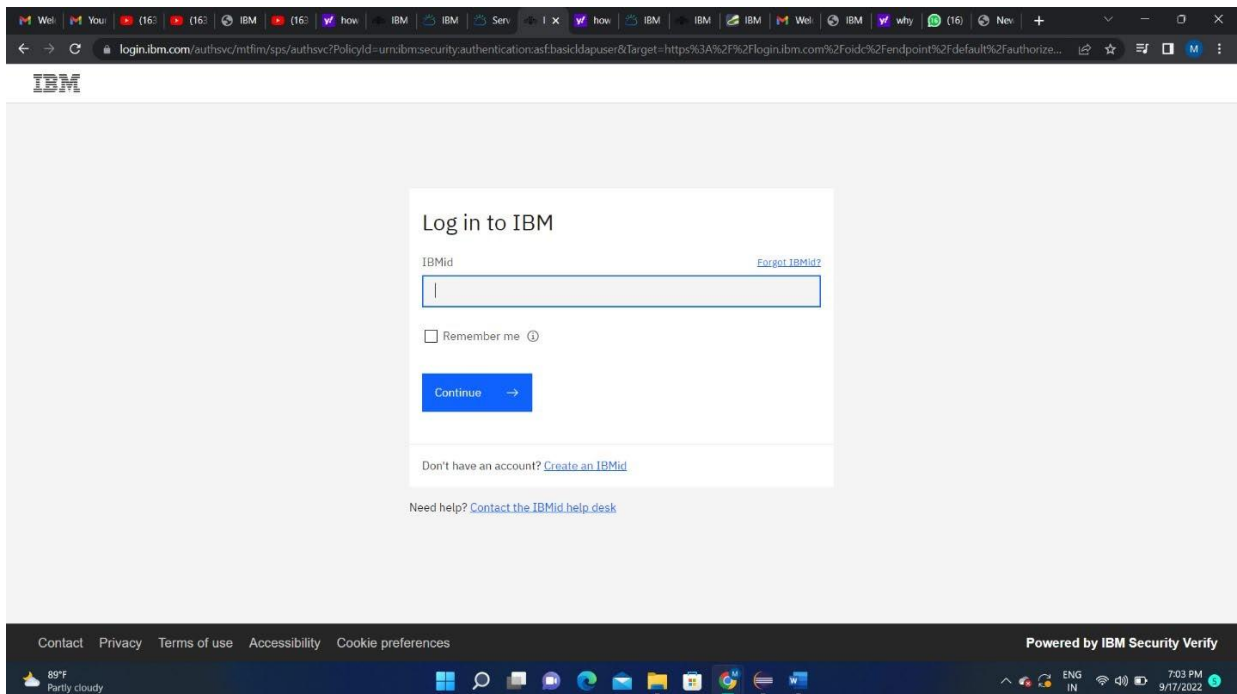

The screenshot shows the IBM Cloud IoT Platform console with the 'Plan' tab selected. The main content area displays the 'Current plan' as 'Lite'. The 'Features' section lists: 'Includes up to 500 registered devices, and a maximum of 200 MB of each data metric', 'Maximum of 500 registered devices', 'Maximum of 500 application bindings', and 'Maximum of 200 MB of each of data exchanged, data analyzed and edge data analyzed'. The 'Current usage' section shows 'N/A' and a note: 'Lite plan services are deleted after 30 days of inactivity.' Below this, there's a 'Change pricing plan' section with a table showing the 'Lite' plan and its features.

Plan	Features	Pricing
Lite	Includes up to 500 registered devices, and a maximum of 200 MB of each data metric Maximum of 500 registered devices Maximum of 500 application bindings Maximum of 200 MB of each of data exchanged, data analyzed and edge data analyzed	Free

8. Clicking on the launch button in the manage tab, it will open to this

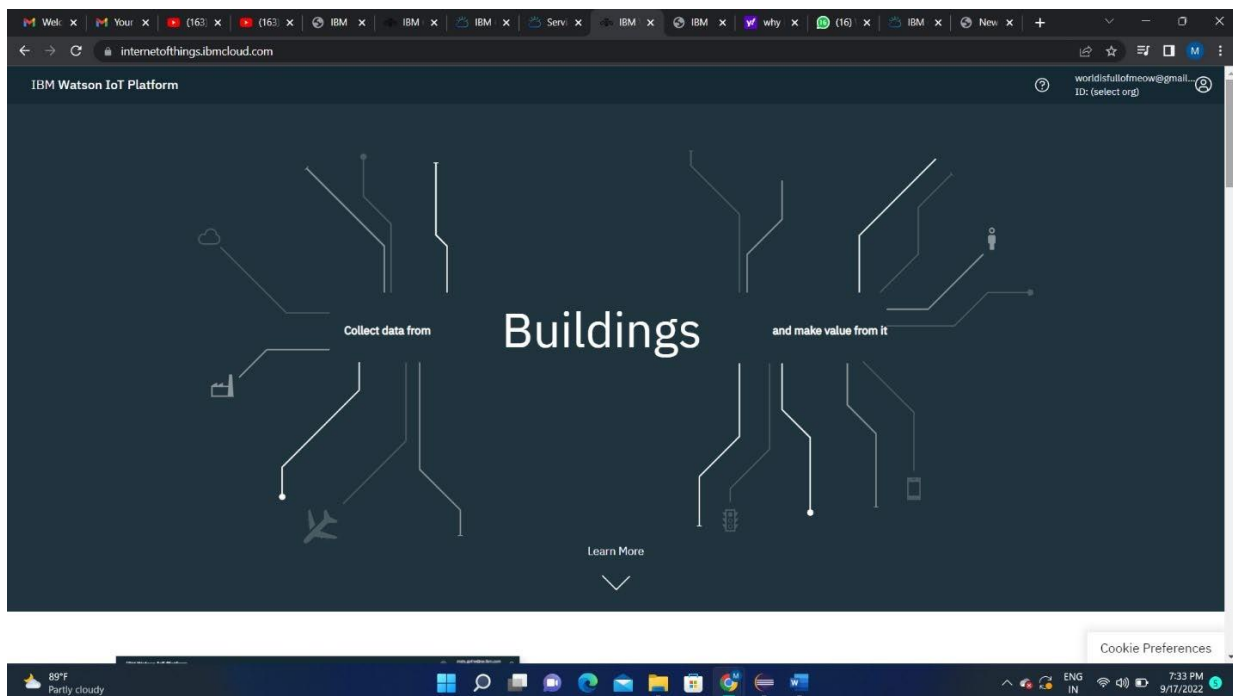

9. Enter the details to sign in to the Watson Cloud to create a device

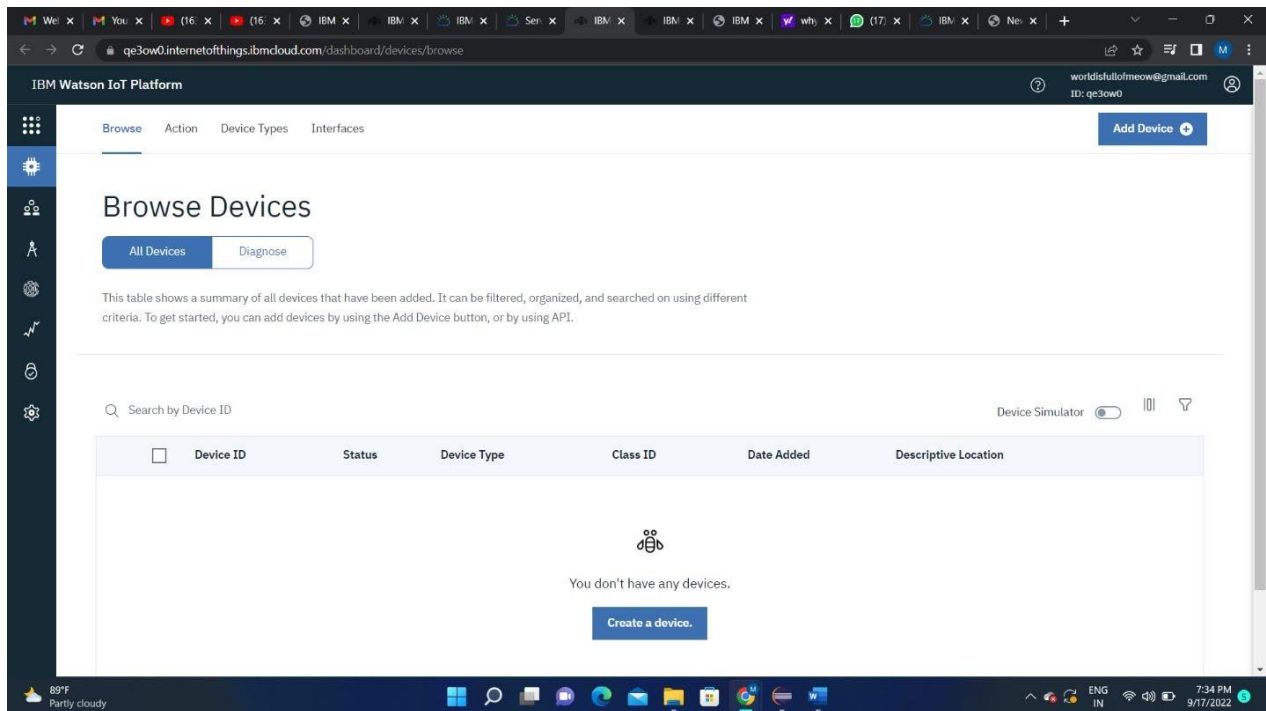

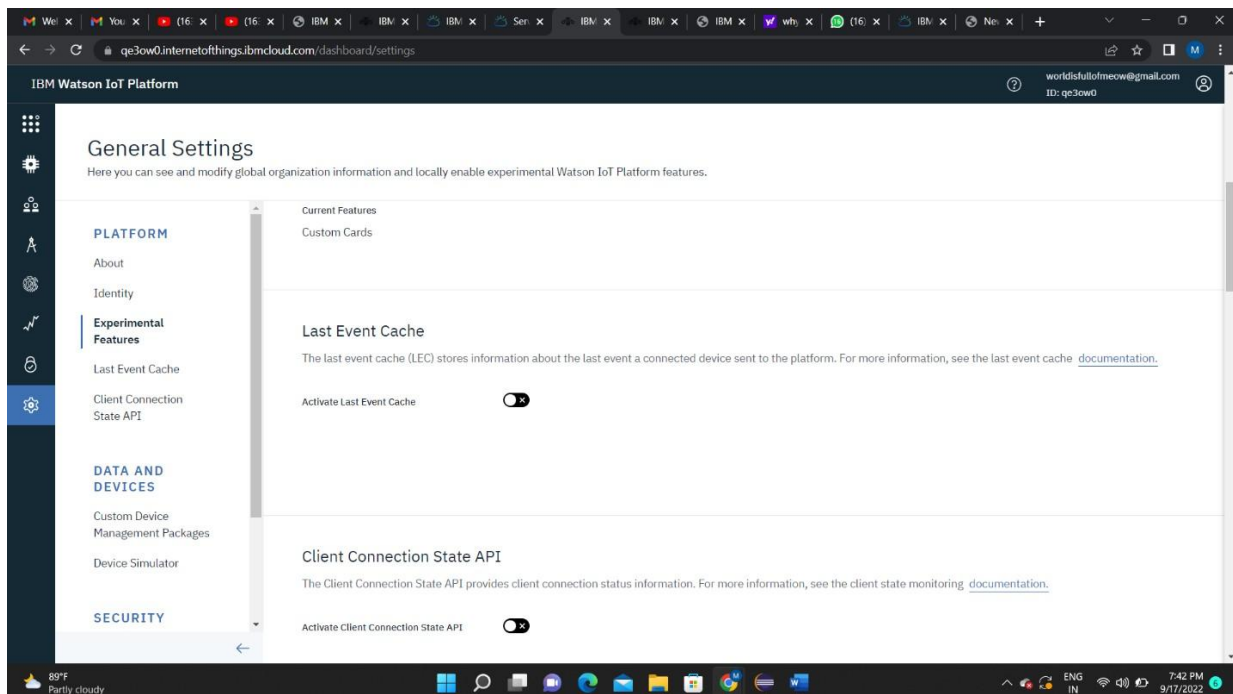

10. Once logged in the name will be displayed and it goes back to the first page

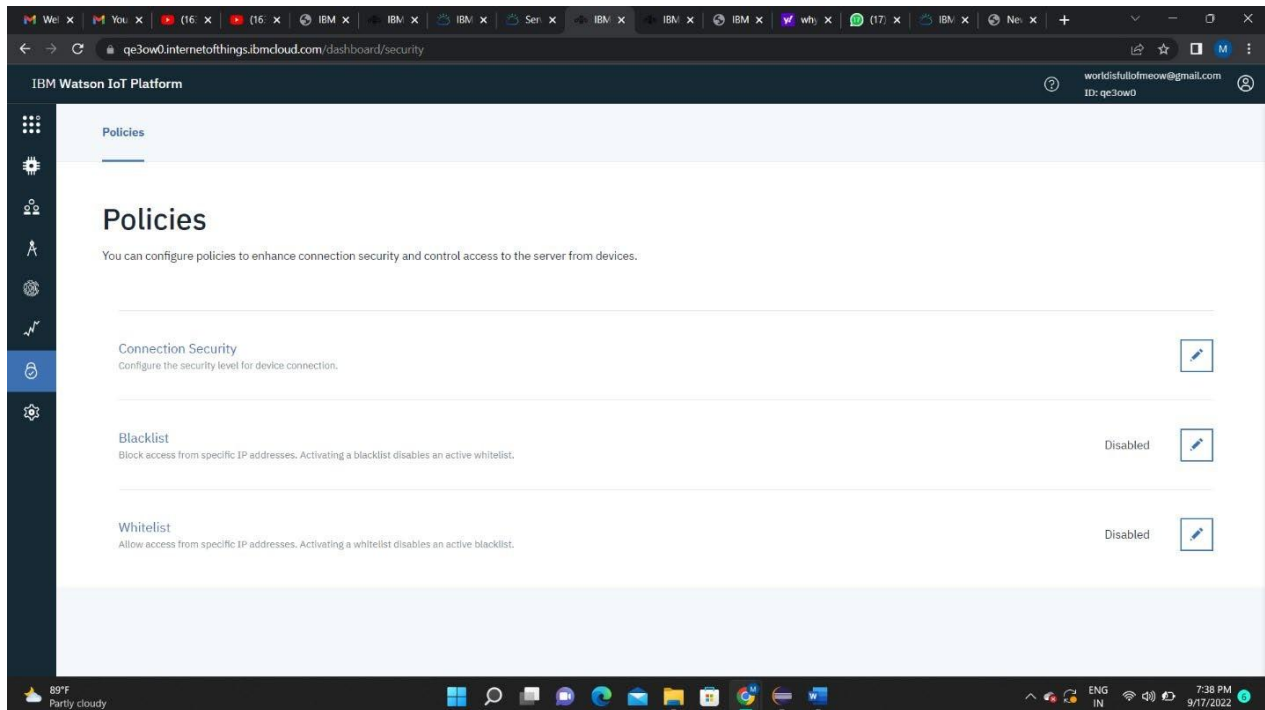

11. And again clicking on the launch button will open this tab, the device will help in the creation of the devices, the addition of devices, and the display of details of the devices.

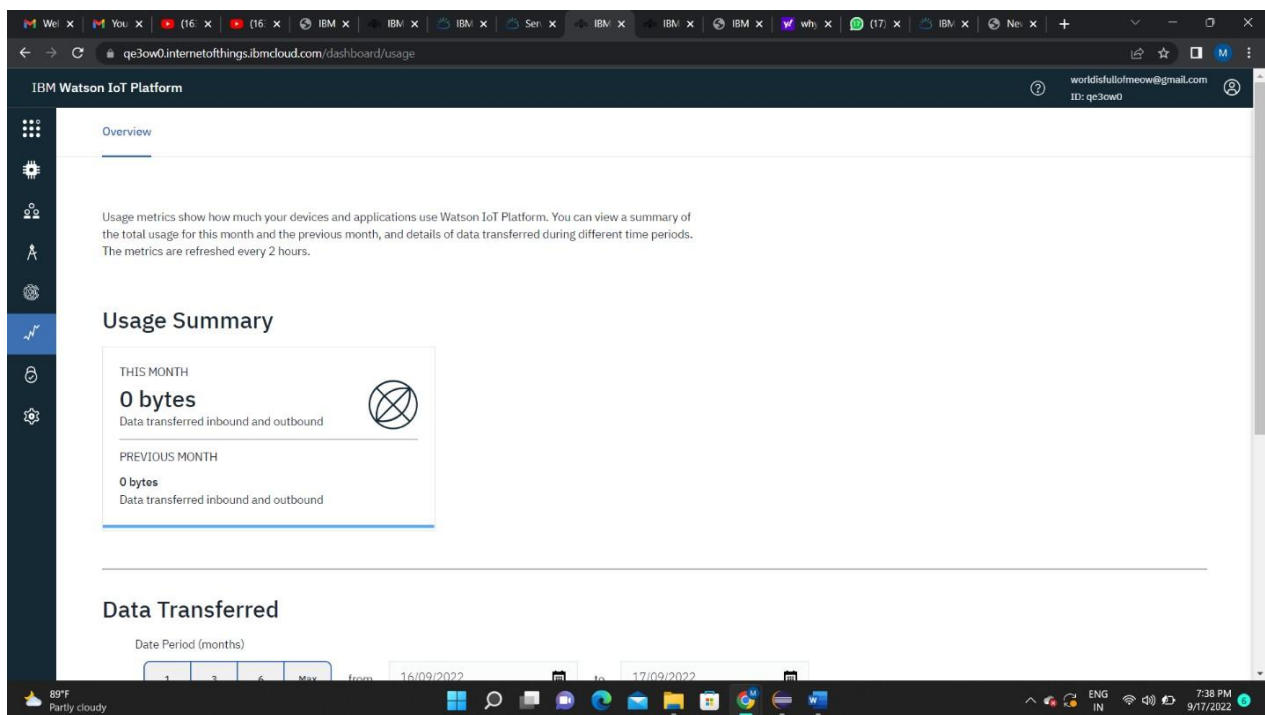

12. The setting tab is used to change the general setting if needed for the project.

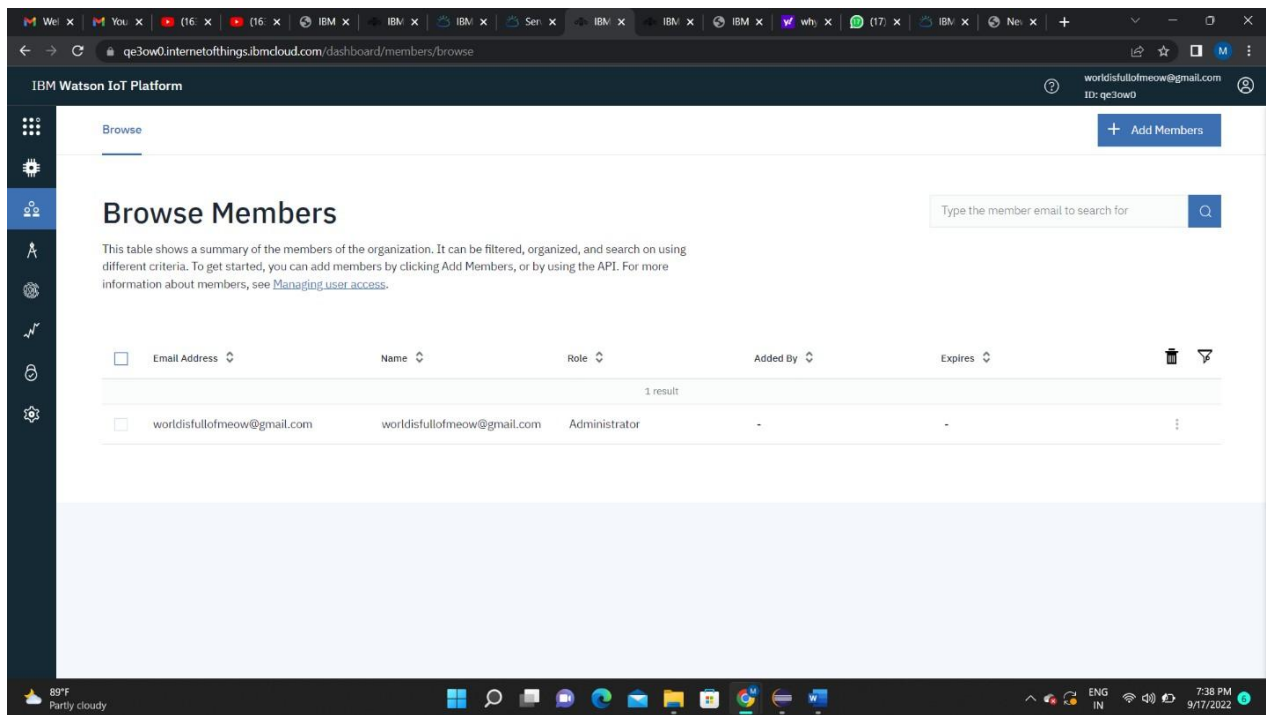

13. In the security tab we can choose the type of security connection and can change according to specification

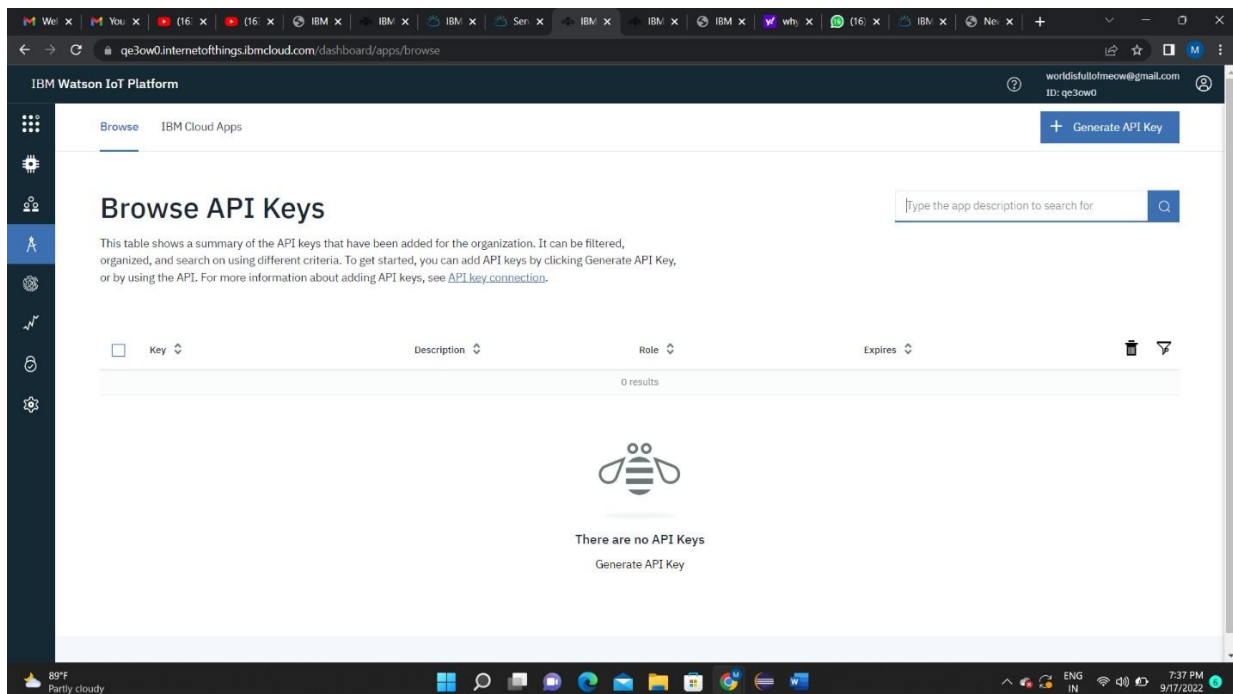

14. Usage gives the summary of how many bytes are used between the devices and the IBM cloud.

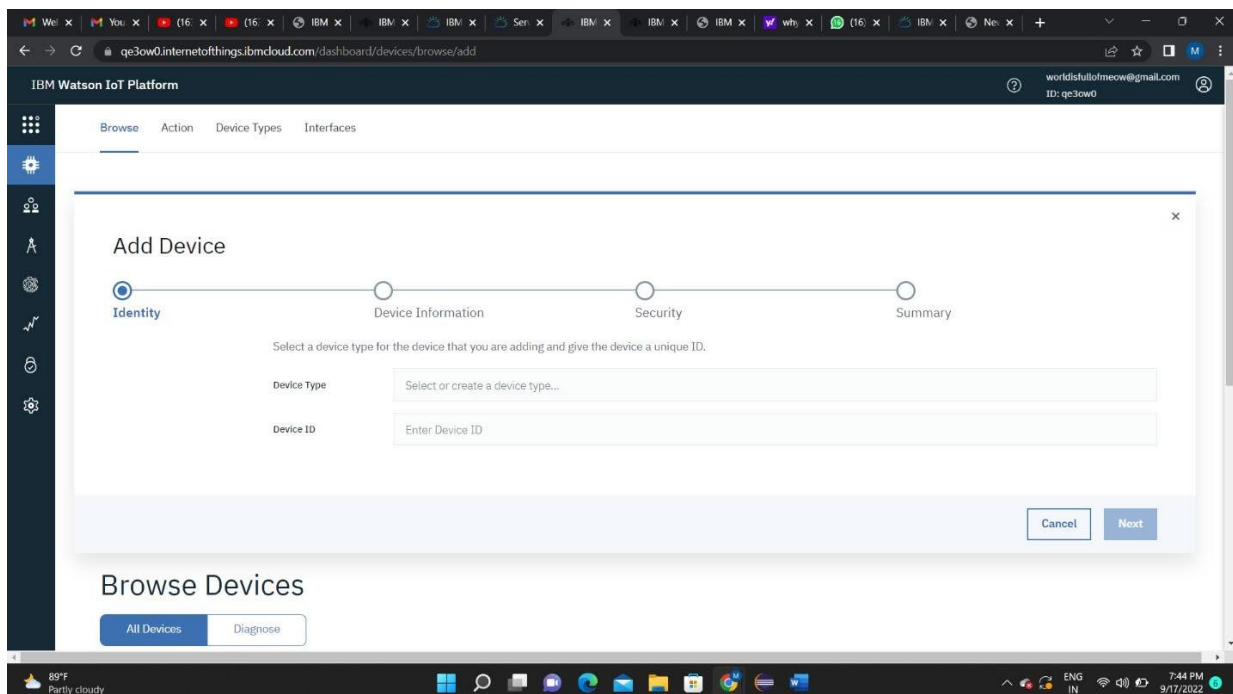

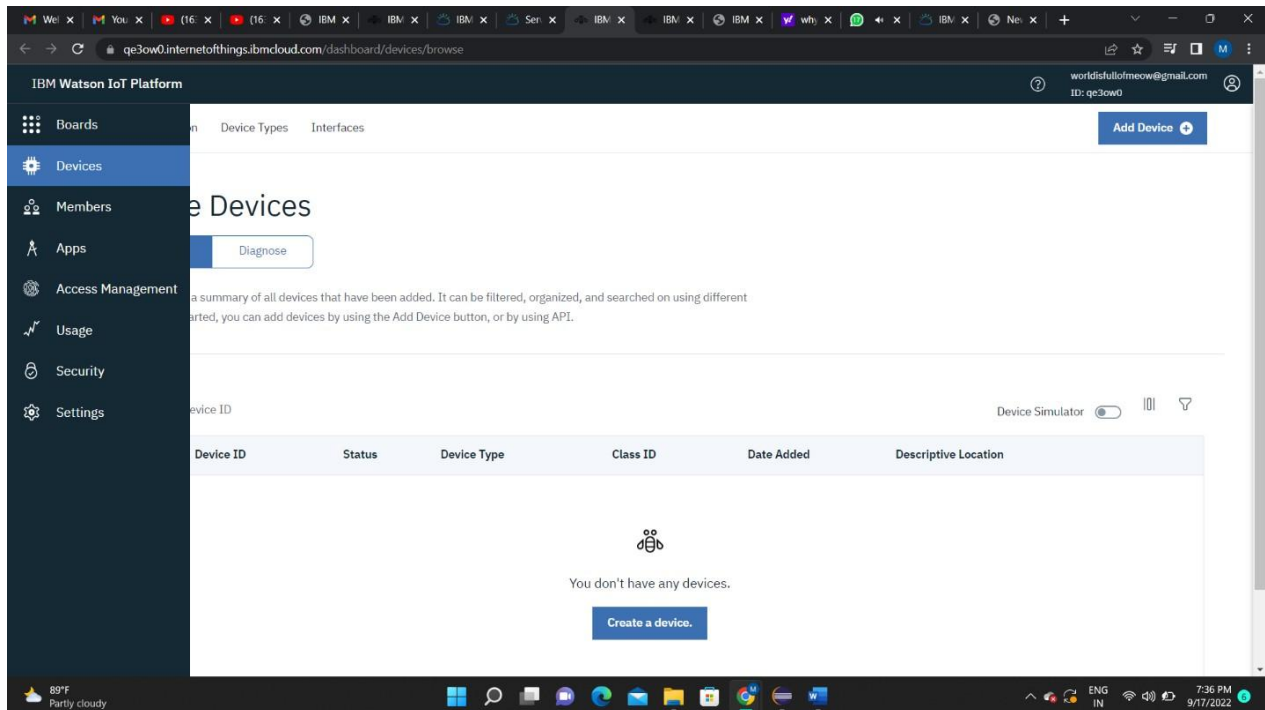

15. The member tab is add the teams members to work in the platform

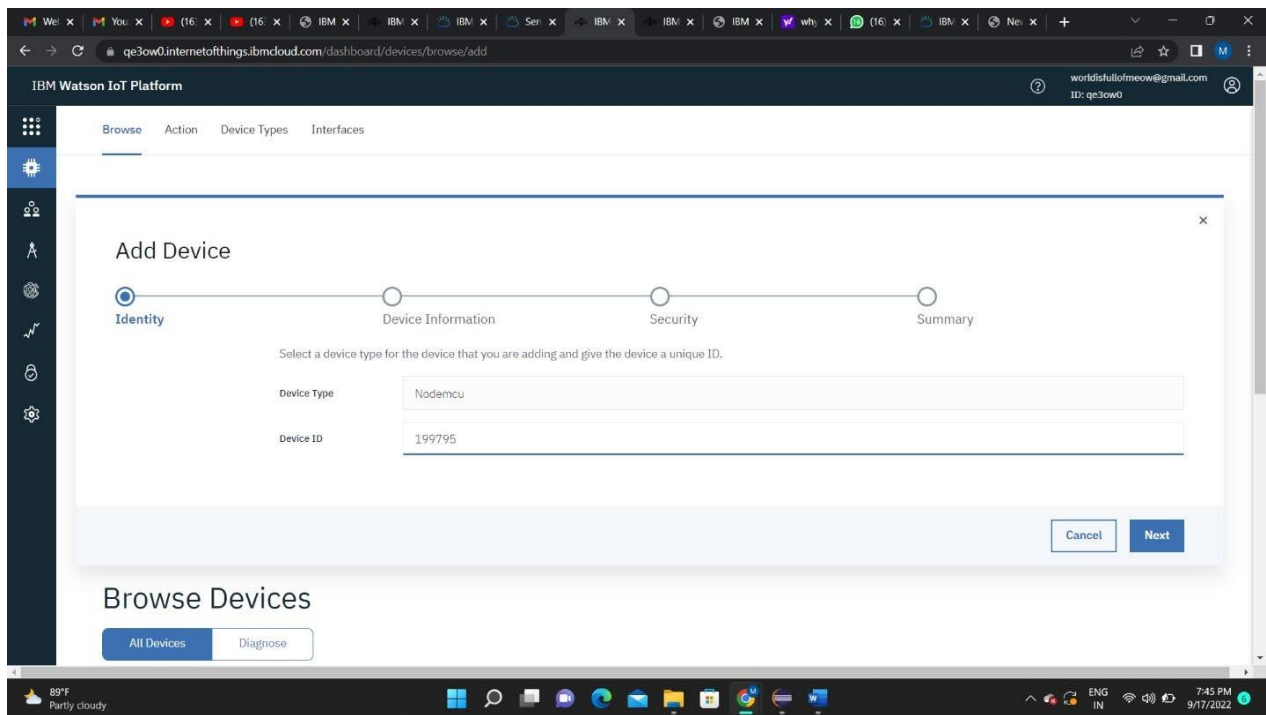

16. This tab is used when you want to connect to some other platform and to integrate with other services.

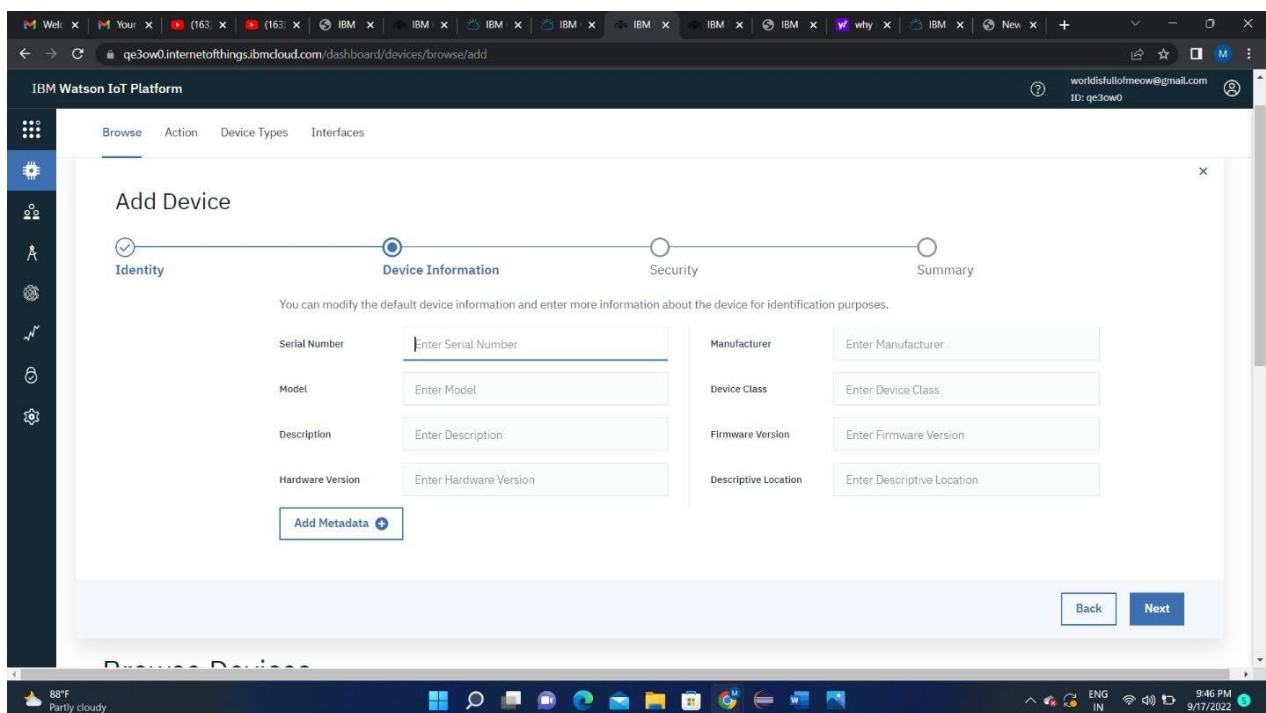

17. Click on the device tab and click on the add device button, then give the device type and device id and click next

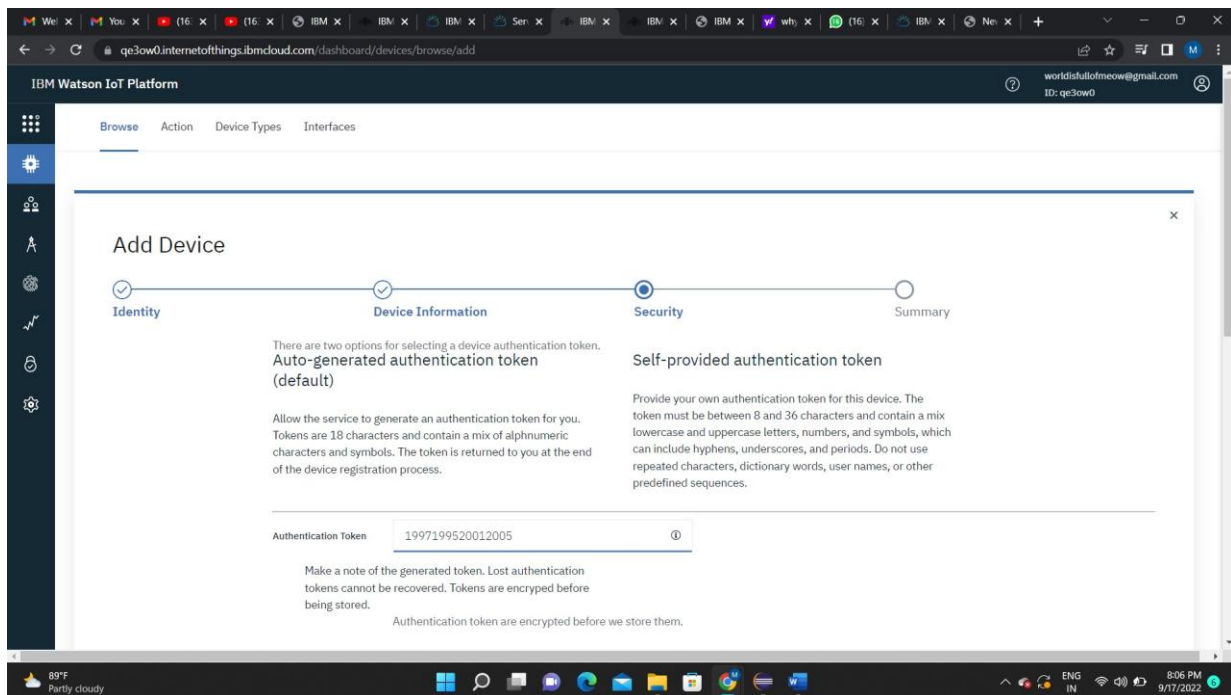

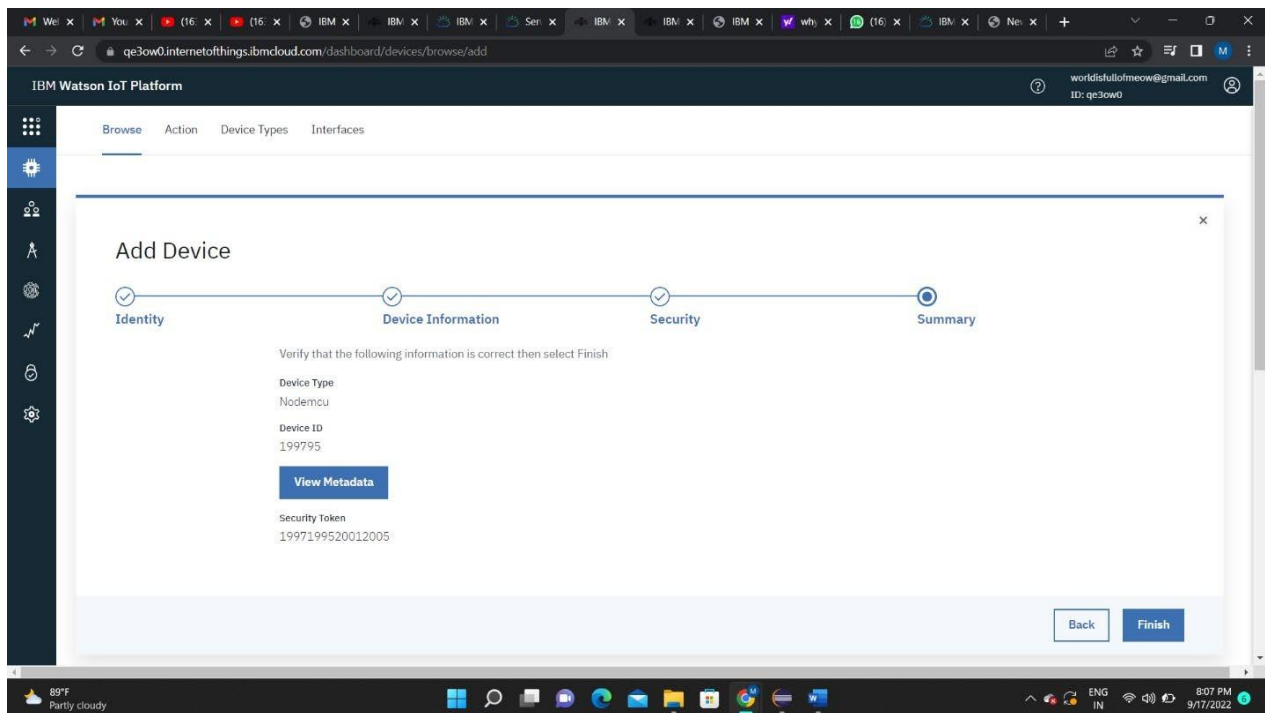

18. This page to enter extra details and of the hardware

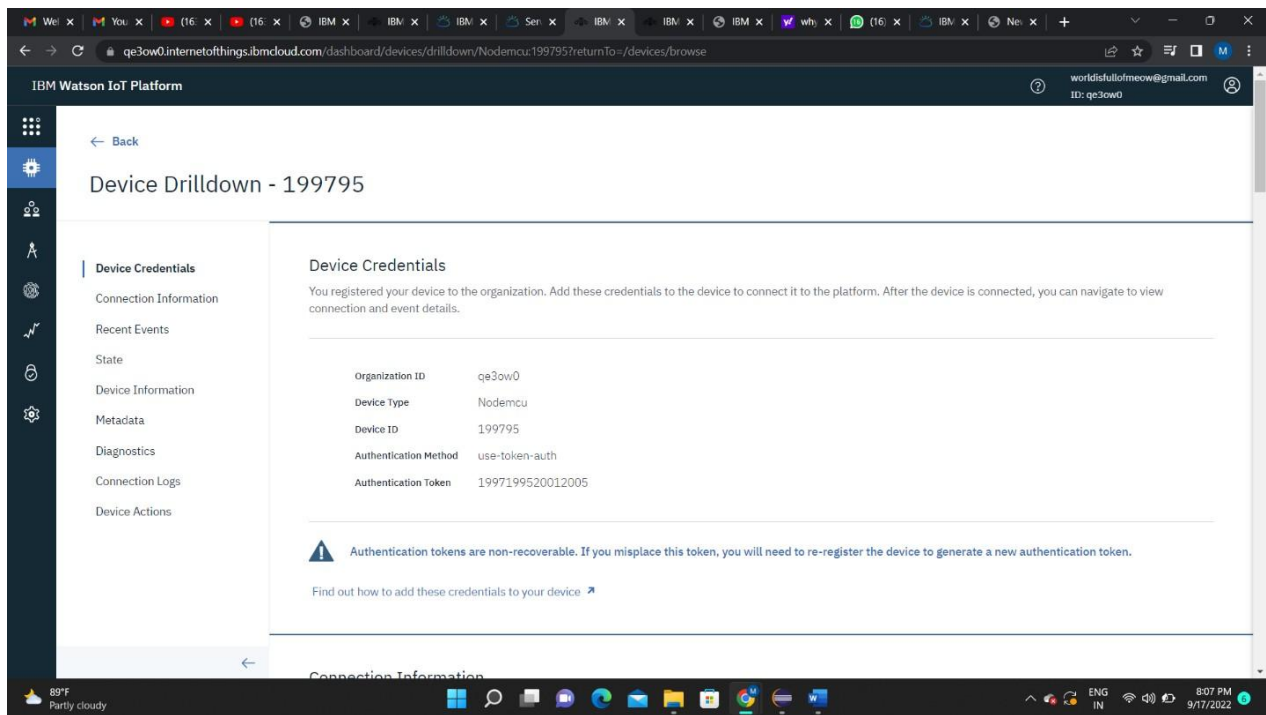

19. Clicking next it goes to the security where we do authentication token id.

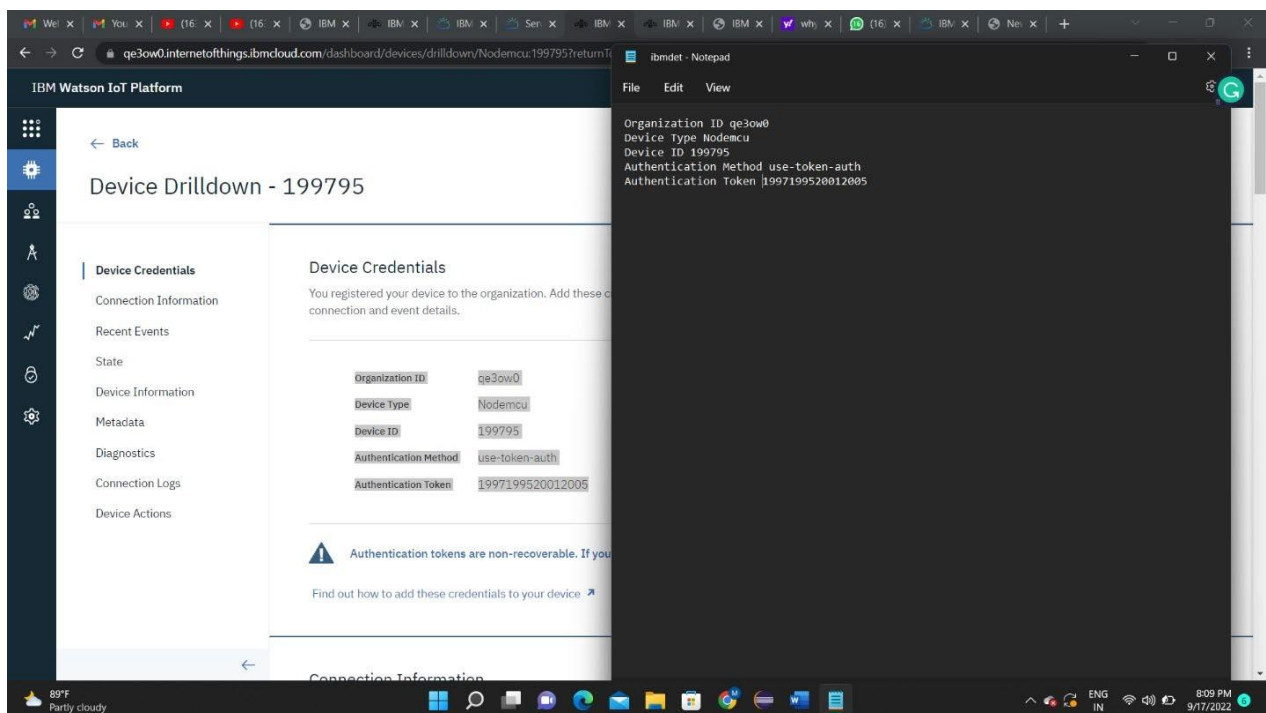

20. Clicking on next it goes to the summary of the device then click finish

21. The device credentials will be displayed with all the details

22. Save the details of the device as the authentication tokens are non-recoverable and if misplaced then we have to create a new one.

23. Clicking on the device tab we can now see the added device. Clicking on it will display the other details.

It has different tabs like Identity, Device Information, State and login.

The screenshot shows the IBM Watson IoT Platform dashboard. The top navigation bar includes 'Browse', 'Action', 'Device Types', and 'Interfaces'. A search bar is present with the text 'Search by Device ID'. Below the navigation bar, there is a table listing devices. The first device is selected, and its details are shown in a modal window. The 'Recent Events' tab is active, displaying a message: 'The recent events listed show the live stream of data that is coming and going from this device.' Below this message is a table with columns: 'Event', 'Value', 'Format', and 'Last Received'. The table is currently empty, and a message at the bottom says 'Waiting for device events...'. The device details modal shows the following information:

Device ID	Status	Device Type	Class ID	Date Added	Descriptive Location
199795	Disconnected	Nodemcu	Device	17 Sep 2022 20:07	

The modal also has tabs for 'Identity', 'Device Information', 'Recent Events', 'State', and 'Logs'. The 'Recent Events' tab is currently selected.

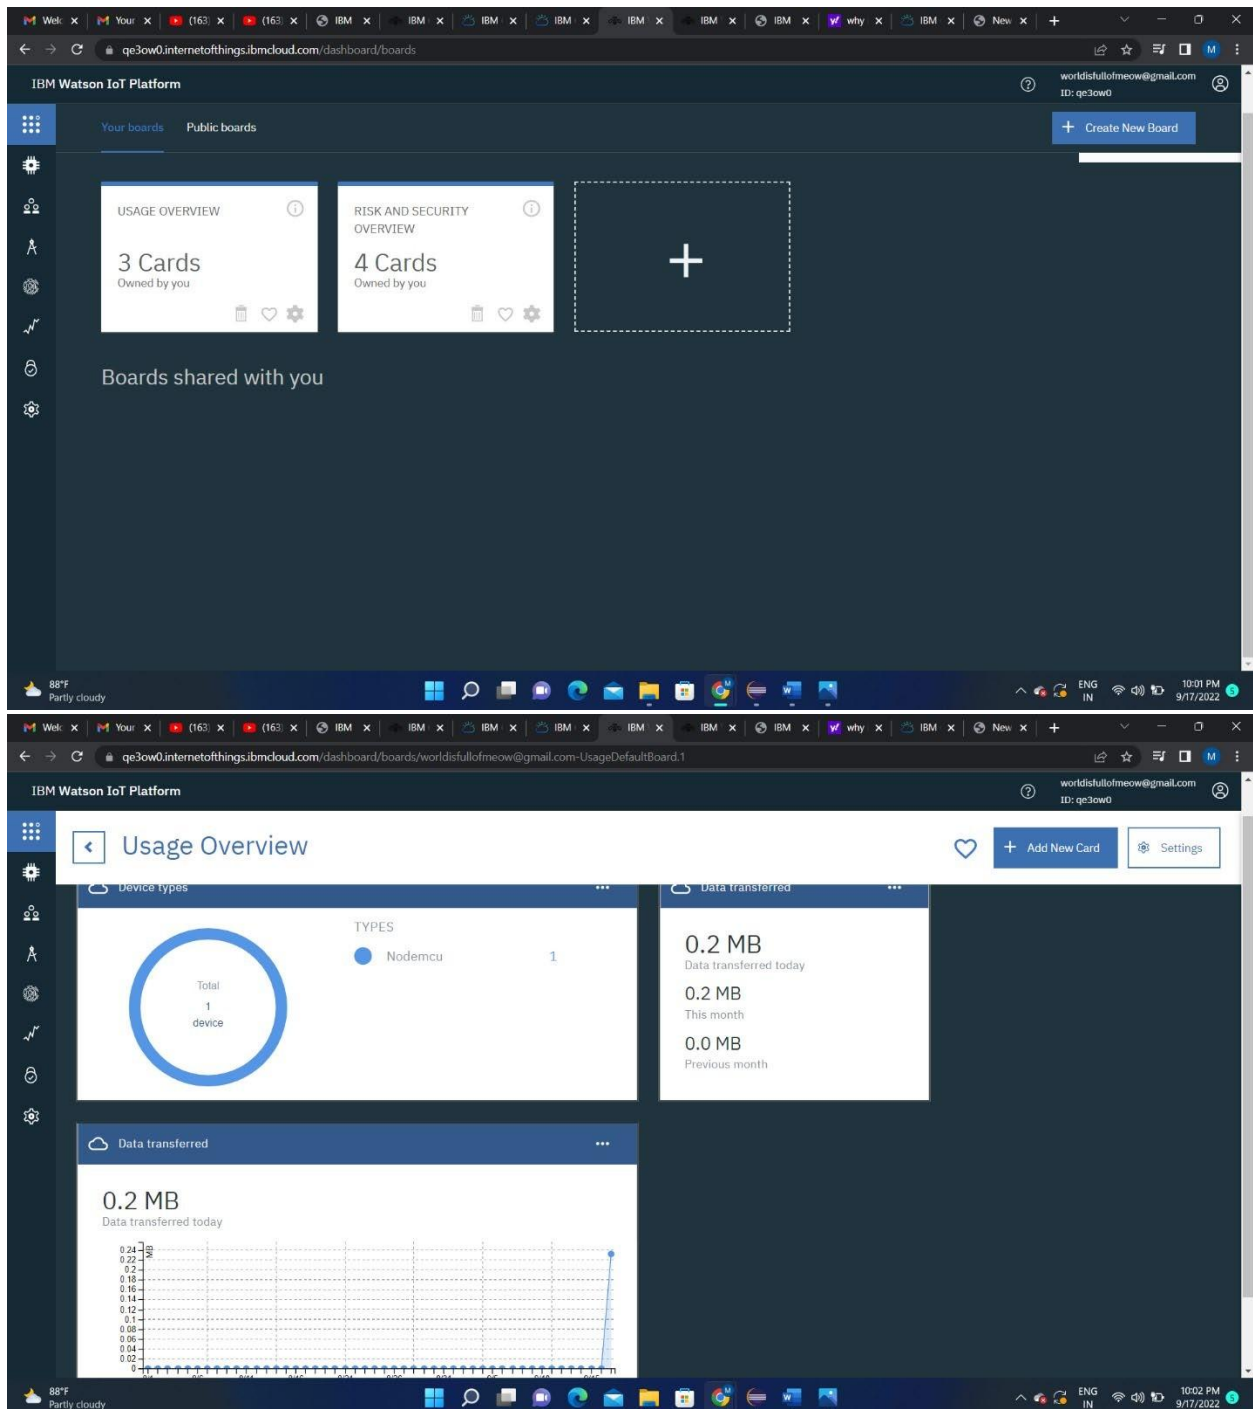

The screenshot shows the IBM Watson IoT Platform dashboard. The top navigation bar includes 'Browse', 'Action', 'Device Types', and 'Interfaces'. A search bar is present with the text 'Search by Device ID'. Below the navigation bar, there is a table listing devices. The first device is selected, and its details are shown in a modal window. The 'Device Information' tab is active, displaying the following information:

Device ID	199795
Device Type	Nodemcu
Date Added	17 Sep 2022 20:07
Added By	worldisfulofmeow@gmail.com
Connection Status	Disconnected

The modal also has tabs for 'Identity', 'Device Information', 'Recent Events', 'State', and 'Logs'. The 'Device Information' tab is currently selected. At the bottom of the modal, there is a pagination control showing 'Items per page: 50' and '1-1 of 1 item'.

In a similar way, we can create n number of devices with a 50 per page limit as per the requirement of our project.

24. The Boards will display card for the project.

RESULT:

An IBM Watson cloud for IoT and a device is created
